Illustrating the theory of managerial economics with an integrated case on the soft drink industry, this text shows students how to solve real business problems by enabling them to apply economic principles to everyday business activity.

The fifth edition of 'Managerial Economics' includes: a new chapter on the multinational corporation and globalization, new examples throughout the text, specific lists of learning objectives, and a greater focus on the application of regression analysis and forecasting to business problems.

For upper-level undergraduate and first-year MBA courses in managerial and applied economics. This Global Edition has been edited to include enhancements making it more relevant to students outside the United States This text will excite readers by providing a more linear progression, while proving the consistency and relevance of microeconomic theory. The Seventh Edition welcomes a new co-author, Stephen Erfle of Dickinson College, who has contributed many revisions and improvements to the quantitative sections of the text, as well as provided a major addition: the use of Excel in the presentation of many of the numerical and graphical illustrations presented throughout the text. To strengthen students' ability to use Excel—a critical skill in today's job market—new Excel Applications (Excel Apps) allow readers to turn the static figures and tables in the text into dynamic illustrations.
